

RMS Pedestrian Fencing

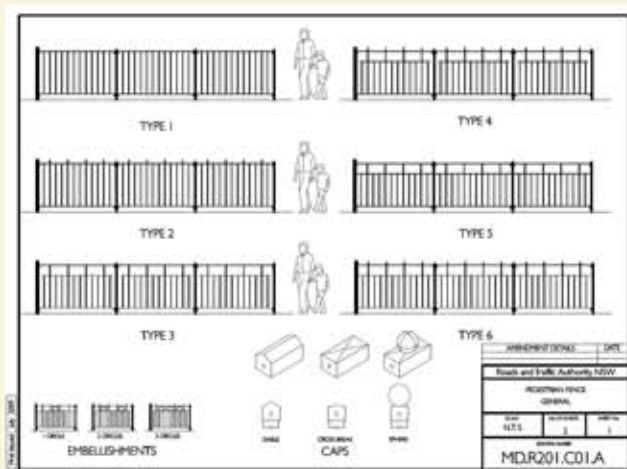

Type 1 pedestrian fence is manufactured and installed by Encat to prevent pedestrians falling onto or crossing the road at a mid point.

- * Hot dipped galvanized
- * Made to Australian standards
- * Modular panels are easily replaced if damaged
- * Powder coated in any colour
- * In-ground or Base-plate mounting

Type - 1

Encat supply, install and repair all styles of pedestrian fence.

Pedestrian walking patterns change immediately after the road fence is installed.

"I have witnessed firsthand the effectiveness of pedestrian fencing; Encat installed a section of pedestrian fence in a busy commercial area; despite traffic lights, speed limits and policing, there was a constant stream of pedestrians crossing the road at a mid point. After we installed the road fence all pedestrians crossed at the traffic lights, a win for motorists and pedestrian safety, lives saved. I love being part of this great product" Encat CEO
